

CHICAGO WHITE SOX

May 6, 2010

Dear Tracy and Dan,

I am writing to you to express my pleasure in the Alpha-Stim. We have been using this modality for many years now and I must tell you that it is one of my favorites. Its compact size, portability and ease of use make it a great on-the-go choice. It fits perfectly in our travel trunks and medical kit so that we can use it anywhere.

We use the Alpha-Stim on a variety of injuries. We have found for us that the Alpha-Stim works really well on acute injuries like bruises, strains and sprains. We can use the probe in the dugout to treat a bruise on a player that has gotten hit by a ball. We use it on travel days on the plane or on the bus. The Alpha-Stim is so easy to use that we send it home with the injured player so that he can continue to be treated all through the night, we teach them how to set the intensity and they can make adjustments as needed.

Again, I would like to thank you for introducing us to the Alpha-Stim device and for your special attention to our questions and needs along the way.

All the Best,

A handwritten signature in blue ink, appearing to read 'Herman Schneider', written over the typed name.
